Education for Life

Important Notice

Education for Life has a new address in the UK:

49 Midland Drive, Carnforth, LA5 9UE

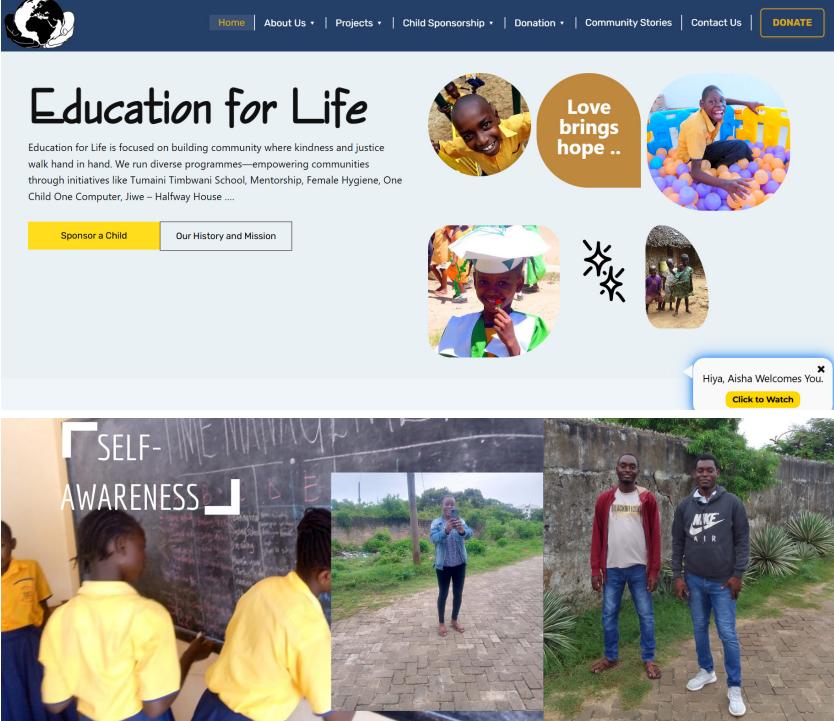

Our telephone number remains the same: 0300 121 1524

Remember to check out the new look website: www.educationforlife.net

Hope is like a sprouting seedling—small and unseen at first, yet full of promise. With care and faith, it breaks through the darkness, reminding us that growth is always possible. All these stories beautifully show the presence of hope woven through every step of our journey.

The Three Musketeers - Mentorship, New Website & Database

Meet Emmanuel, Patrick, and Josephine, three young individuals whose lives reflect the transforming power of education. Once beneficiaries of Education for Life, they now return as creators, using their skills to build a new website and a digital portal that streamlines school operations, enriches sponsor engagement, and strengthens relationships.

Through mentorship, in partnership with teachers, their story comes full circle as they walk back into Tumaini with open hearts to guide, encourage, and inspire young learners to believe in the possibilities ahead.

The Well: The Beginning of New Hope

The well stands as a symbol of hope. Hidden for over twenty years, its water was once fresh and safe for drinking and cooking. We cleaned, deepened, and treated it, but after increasing its depth, the water became salty due to the school's proximity to the ocean.

We found a company providing quality desalination equipment, with a team of experts delivering cost-effective, high-quality solutions for safe drinking water. The system includes Reverse Osmosis, general filtration, pure water treatment, and UV disinfection, and can be powered by solar energy.

This would greatly benefit learners, staff, and the community. The quotation is just under **£25,000** at current exchange rates.

◆ New Look: Nursery Wing & Grade 8 Classroom ◆

No one imagined these rooms would one day be filled with laughter and learning. Now they stand as symbols of hope, where children sit at colourful tables with eyes full of curiosity.

This transformation is more than construction—it's a story of faith, love, and possibility, turning the impossible into a new beginning for Tumaini's youngest learners.

The Grade 8 students once learned in a worn, weather-beaten room with an old roof and dull walls. Now, with a new roof, fresh paint, new flooring, and windows, the same space is brighter, cleaner, and far more comfortable—a classroom renewed with hope.

Mwema's story is one of hope and transformation. Orphaned at a young age, he found a home, family, and education through Education for Life. After completing Grade 8, he joined vocational training and discovered his talent as an artisan. Today, he gives back to Tumaini Timbwani School through painting, renovation, and rebuilding—each stroke reflecting his gratitude and renewed hope for a brighter future.

CBC Transition
to Grade 10

Message from Glyn, Jane & Maureen

Thank you so much for your generosity and commitment to supporting the community in and around Tumaini through Education for Life.

With the CBC curriculum moving to Grade 10 in 2026, the school has been approved to begin offering Senior School education as the old system is phased out. This milestone opens a new chapter, allowing learners to complete their secondary education in a familiar, supportive environment. It reflects years of preparation and a commitment to nurturing each learner's potential, a steady step toward a stronger academic future.

We have entered an exciting phase, where 'fruit' is increasing and impact further reaching. We are thankful to God and to all who partner with us in support from afar and the team here for their hands on, day to day service. God bless you into 2026 and beyond.

Thank
You!
